

Vitaly Shutov

AI Prompt Engineer

✉ braindamaged10236@gmail.com

Profile

Prompt engineer and researcher with experience in testing and creating prompts for LLMs. Skilled in online research and structuring information into clear, actionable cases. Fast learner with good problem-solving skills and attention to detail. Motivated to grow in AI, OSINT, and practical research projects

Skills

Prompt Engineering

- Creating and testing prompts for LLM (Zero-shot, Few-shot, CoT, Tree of Thoughts). Superficial knowledge of virtually all other techniques. Using various AI and LLM models since the launch of ChatGPT. Understanding of prompt structure, what constitutes a good, structured prompt that does not allow the model to rely on fictional or unreliable sources. Knowledge of the importance of the first paragraphs of a query for building the model's understanding, token limitations and blind spots, serious errors and hallucinations of the model after tokens are exhausted. Willingness to implement APIs into various services as templates for queries, etc.

OSINT / Online Research

- Collecting information from open sources.
- Analyzing and structuring data into logical cases and reports.
- Working independently with systems according to instructions.

Soft Skills & Emotional Intelligence

- Quickly mastering new tools and techniques.
- Attention to detail and accurate handling of information.
- Emotional intelligence: ability to work with people and explain complex things in simple language.
- Good analytical skills: ability to find key points in scattered data and draw logical conclusions.

Technical Skills

- Windows / Linux: basic commands and environment, independent advanced work with systems according to instructions.
- Adobe Premiere Pro / Photoshop: basic video and image editing.
